Technology Overview

Intel® Viiv™ (sounds like “five”) technology is Intel’s new brand for a suite of hardware and software that is an essential ingredient for consumer PCs and establishes a baseline in performance and features for home entertainment. The technology is enabling a new breed of exciting home PCs that is transforming how consumers manage, share and enjoy a broad and growing assortment of digital movies, music, and other entertainment-related content in and around the home.

Each Intel Viiv technology-based PC brings consumers such capabilities as surround sound audio, stunning playback of high definition video, instant on and off (after initial boot up), and the power to handle simultaneous usages with an Intel dual core processor. Consumers can also enjoy all of their digital entertainment from the comfort of the sofa while several feet away from the actual PC, using the Microsoft Windows® XP Media Center Edition operating system and a remote control.

In order to provide consumers with a growing library of premium on-demand, Internet-delivered entertainment services, Intel is working with a wide variety of entertainment companies worldwide to verify millions of hours of movies, TV shows, music, games and more with Intel Viiv technology to ensure a seamless digital entertainment experience. As part of this effort, Intel is also working to make certain that all verified content and services carry an identifier that reads, “Enjoy with Intel Viiv technology.”

Digital content premiering throughout 2006 on Intel Viiv technology-enabled PCs can be found on pages 4-15. Your Intel Viiv technology-based PC will display specific offerings available in your country.

arvato mobile – GNAB for Video and Music* (Multiple Countries)

GNAB is a white label download platform for all types of digital content, including music, music videos, HD movies and TV series. GNAB is based on an innovative Peer-to-Peer (P2P) technology and increases customer loyalty in core target groups by actively including them in the community design. End users can browse through the homepages of other users and recommend content to each other. Therefore GNAB allows highly-advanced community features.

The architecture of this P2P platform allows distribution of content in a more efficient way and in better quality compared to centralized download platforms. GNAB can also implement different business models, like download-to-own, video-on-demand (VOD) and electronic-sell-through. The GNAB platform has been successfully implemented in consumer brands like in2movies, JPC and Medion.

BBC Newsfeed* (United Kingdom)

Watch BBC Newsclips when it suits your lifestyle – all of the world's news is just two clicks away. The United Kingdom version gives prominence to the breadth and depth of BBC content in the United Kingdom including news, sports and weather along with United Kingdom radio and TV. The international version gives prominence to world news, sports and weather along with BBC's international radio and TV services.

Bellrock Media Japan, Inc. – ZZZ.TV*(Japan)

Bellrock Media is creating new ways of delivering entertainment content with "ZZZ.TV," a new VOD service where users can access a wide range of entertainment video and content free of charge, including HD-quality short movies and comedy shows.

British Sky Broadcasting – SKY BY BROADBAND* (United Kingdom)

Sky is offering a new service exclusive to Sky digital customers in the United Kingdom and the Republic of Ireland¹ who have a broadband Internet connection and subscribe to Sky Movies 1 & 2, Sky Sports 1 & 2 or the Sky World package. If you subscribe to Sky Movies 1 & 2, you can enjoy hundreds of great films on your PC, including a mix of Hollywood blockbusters and classic movie titles. In addition, if you subscribe to Sky Sports 1 & 2 you can also enjoy highlights from many of the major sporting events on Sky Sports.

¹Sky will be making some of this service available to non-Sky digital customers in August 2006.

Broadband Tower, Inc. – Detective Office 5* (Japan)

"Detective Office 5" brings the movie and Internet industries together to provide a new style of entertainment for the digital home era. "Detective Office 5" is a series of net cinema originally produced and developed for the Internet that will offer users 26 exciting new stories a year, with two new stories every month following.

CANAL+ GROUP – CANALPLAY* (France)

With a very large choice of videos, CANALPLAY is the groundbreaking VOD store of CANAL+ group. With CANALPLAY, consumers can choose the videos they want to download and then watch them whenever they want, wherever they want. CANALPLAY offers a wide range of videos, including new releases and French and international films, as well as programs for kids and much more to come.

CyberLink Corp. – CyberLink MagicDirector* (PRC, Korea, Taiwan and Japan)

CyberLink MagicDirector is an automated video editing software that takes out tedious work from editing videos. It offers a number of movie style options that once applied to a video clip, MagicDirector will automatically trim out unwanted videos based on an intelligent video analysis algorithm; and apply video effects, transitions, frames and clip arts to produce exciting home movies. Users can add background music and titles via the virtual keyboard. It also offers options allowing users to brighten up video images and remove background audio noise.

ESPN Motion* (United States)

ESPN Motion is a proprietary technology that brings sports videos directly to the PC. Integrated into the pages of ESPN.com, ESPN Motion delivers highlights, original content, studio program segments and more to the site's 15 million-plus monthly users – with no streaming or waiting. In 2006, select ESPN Motion content will be accessible at high-resolution quality on Intel® Viiv™ technology-based PCs. Content will be refreshed based on a pre-determined schedule and viewers' interests.

Glowria* (France)

Glowria is one of the leading European online DVD rental services, with over 10,000 titles available for the French and German Internet users. It also offers a compelling and wide VOD catalogue, ranging from new releases and blockbuster movies to TV series and documentaries. Glowria currently proposes 1,000 titles in VOD, an offer that will grow to 2,000 titles by the end of July 2006.

Gretech Corp. – ipop Movie* (Korea)

With an excellent lineup of the most recent movies and animations, ipop Movie offers users more than 7,000 titles of high-quality VOD service supporting 5.1CH sound systems. This movie service has been developed based on GOM Player – the No.1 multi-media player in Korea.

LOVEFILM.com* (United Kingdom)

Let the cinema come to you

With more than 400,000 subscribers, LOVEFILM.com is Europe's leading home entertainment subscription service. The company won the prestigious British Video Association's 2005 award for the United Kingdom's Best Rental Service and 98 percent of LOVEFILM.com members recommend the service to their friends.

In addition, LOVEFILM boasts a sophisticated customer preference system, as well as a movie review and critic service. Customers across Europe will be able to choose from up to 70,000 DVD titles – some of which will be available as VOD as well as download-to-own. The company also has exclusive licensed content, as well as short films and games.

Movielink* (United States)

Movielink is a movie download service offering a wide selection of movies, TV shows and more for rental or purchase. Download from Movielink* with no subscription and no late fees, and enjoy on your Intel® Viiv™ technology-based PC from the comfort of your couch.

MTV Networks – MTV Overdrive* (United States)

Create your own playlists and stream the latest news, celebrity interviews, behind-the-scenes footage, movie previews, live performances, short-form shows, music videos and clips from top MTV shows.

muvee Technologies – muvee autoProducer unPlugged* 1.3 (PRC, Korea, Taiwan, Japan and United States)

muvee autoProducer unPlugged is the first and only automatic home movie-making software for the Media Center platform. Using a Media Center remote control, users can select their videos, pictures, music and an editing style. muvee autoProducer unPlugged automatically cuts footage highlights to the music, with transitions and style effects synchronized to the beat, creating a professional-quality production instantly. Twenty four unique styles are included, with more than 100 additional plug-in styles available for download.

NEC – BIGLOBE Stream* (Japan)

BIGLOBE Stream is one of the most frequently visited, free broadband video portal sites in Japan. It provides high-quality videos of various categories from entertainment programs to daily news, practical information and more.

NHN Naver* (Korea)

Naver VOD service offers more than 2,000 movies with a dynamic and attractive user interface.

one4all LTD. – one4movie* (Germany)

one4movie is the new home cinema at your fingertips. Within minutes, gain access to hundreds of net movies either for a single flat-rate fee or as pay-per-view. Available 24 hours. Thriller, action, comedy, drama, cartoons and many other genres.

Orange – 24/24 Video* (France)

24/24 Video by Orange offers movies, animation and documentaries via the entertainment PC with up-to-date functionalities. The content is rich with videos such as blockbusters, classic movies, events (Olympic games) and also includes special programming from Orange (free short movies for example).

Simply order videos of your choice, which are viewable 24 hours after initial access, directly on your entertainment PC or on your TV.

Pinnacle™ Studio Version 10* (United States, United Kingdom, Germany, France, Italy)

Pinnacle Studio version 10 is the next-generation of the industry's most popular home video editing family. With new features, ranging from full native HD support to pan and zoom capabilities, the Studio version 10 product family lets consumers enhance and share precious memories with family and friends, and create stunning home movies in brilliant HD resolution. Home movies can be played on an Intel® Viiv™ technology-based PC from MyMovies.

Rosso Alice* (Italy)

Rosso Alice is the leading Italian broadband portal offering users a wide range of content including live sports events, premiere movies, music (songs, concerts and video clips), realities and news. Rosso Alice is fully browseable and easy to use.

Shanghai Media Group* (PRC)

Shanghai Media Group's extensive media content portfolio is available on the Intel® Viiv™ technology platform, offering users news and financial programming, live sports broadcasts and interviews, 4,000 hours of movies and TV dramas, 200 hours of VOD news and entertainment, and live content.

Sohu.com* (PRC)

Sohu.com is a movie and music portal offering users DVD quality movies and more than 10,000 songs they can purchase individually or through subscription. A majority of the songs available on Sohu.com are self-created, original songs by fellow users.

Tiantian Online* Inc. (PRC)

Tiantian Online, Inc. is the premier cartoon video service in China, offering the Global Top 50 DJ Electronic Music Service, free IP radio and unique programming in collaboration with local TV stations. The catalog includes more than 4,000 local movie titles, 1,000 local TV (Japanese, Korean, TWN, HK) series, 300 cartoon series, as well as games and educational programming from Beijing University. Tiantian Online Inc.'s music selection includes Beijing Radio streaming and other content from China Records and the China Film company.

Tiscali - Video Club* (United Kingdom, Italy, Coming Soon in Germany)

Tiscali Europe is headquartered in Cagliari, Italy, with subsidiaries in the United Kingdom and in Germany. Tiscali provides broadband, dial-up, voice and content services to more than 7 million customers in Europe, making Tiscali one of the largest ISPs within the European market.

The Tiscali Video Service, called Videoclub*, is a virtual video library which allows users to download or stream a growing list of movies, short films and first-choice documentaries from both the major studios and independent distributors. Using Intel® Viiv™ technology-based PCs and Windows® Digital Rights Management customers can download a film and acquire a license independent of the device. This means a film downloaded to a PC is also viewable on a TV within the home. Films can be rented for a nominal fee and grant the customer a 48 hour license. Tiscali is adding titles from award winning independent films and will add Hollywood blockbusters in 2006.

TiVo® - TiVoToGo™* transfers (United States)

Easily and automatically transfer TiVo recordings from a TiVo box to an Intel® Viiv™ technology-based PC with TiVoToGo™ transfers. Now you can watch your favorite shows any time, anywhere.

*2006 TiVo Inc. TiVo, the TiVo logo, and TiVoToGo are trademarks or registered trademarks of TiVo Inc's subsidiaries worldwide. All rights reserved.

T-Online International AG - Video On Demand Services* (Germany)

VOD is an integral part of the T-Online International AG and just celebrated 3 million license sales. Here the user can choose from a steadily growing range of currently more than 1,200 titles - including more than 700 Hollywood blockbusters and first-class motion pictures. The range can be viewed on the TV or the PC via streaming or download. The license period is 24 hours.

T-Online International AG services, such as VOD, are chargeable services that require a T-DSL line and a T-Online DSL access rate for which additional charges apply. DSL is available in many access areas.

Ulead Systems - Ulead* Pocket DV Show (Japan, PRC, Korea, Taiwan)

Ulead Pocket DV Show makes creating DVDs to watch on your TV as easy as shooting your videos. Just connect your DV camcorder and follow the simple on-screen instructions. Discover the fastest way to go from camera to DVD. Just like renting a DVD from the video store, you can enjoy watching your DVDs from the comfort of your living room.

USEN CORPORATION - GyaO* (Japan) Anyone, Anytime, Totally free of charge PC TV - GyaO

GyaO, an ultimate on-demand-media, provides a variety of content such as popular drama, remembered anime, comedy, and latest news. GyaO provides a new style of entertainment for your lifestyle.

webs-tv Digital International Company webs-tv broadband TV* (Taiwan)

webs-tv is the largest online video associated network in Chinese providing more than 200,000 hours of VOD, and broadcasting major TV news in real-time daily with streaming service in Taiwan. Members can watch and listen to a variety of content such as TV shows, movies, music, news, cartoons and animations. In addition, members can share photos stored on webs-tv.

Yahoo! My Channel* (United States)

With Yahoo! My Channel you can choose from a wide variety of clips including the latest movie trailers, current news - even documentaries. Yahoo! Plus users can access even more video including exclusive clips from the latest TV shows and movies.

AOL® Video on Demand* (United States)

The AOL Video on Demand* service – available on Intel® Viiv™ technology-based PCs later this year – will enable on-demand entertainment throughout the house. Consumers will get access to the extensive AOL video library in categories spanning music, television, movies and games, with many available in DVD quality through the new AOL Hi-Q™ Video format. AOL Video on Demand will also feature videos from In2TV™, a first-of-its-kind broadband television network that airs such classic programs as "Welcome Back Kotter", "Babylon 5", "Lois & Clark", "La Femme Nikita", "Growing Pains" and more. AOL Video on Demand will be easily searchable using AOL Video Search, which has been optimized for a home theater environment.

ClickStar, Inc.* (United States)

ClickStar® – Get Closer to the Stars

ClickStar is on the leading edge of the content delivery revolution in home entertainment. ClickStar will offer broadband debuts, first-run feature films premiering exclusively on ClickStar at or near their theatrical release. "10 Items or Less", a redemptive comedy starring Morgan Freeman and Paz Vega, and directed by Brad Silberling, will be the first broadband debut to premiere on ClickStar, later in 2006. ClickStar will also offer Artist Created Channels, a series of on demand thematic channels that provide a unique opportunity for fans to get closer to their favorite stars. One of the first channels to be announced is Danny DeVito's Jersey Docs™, which will offer the best and broadest array in documentary programming bringing the world's leading documentary filmmakers closer to film lovers.

ClickStar was founded by Revelations Entertainment, the production company headed by Morgan Freeman and producer and business partner Lori McCreary, with investment from Intel Corporation. The ClickStar service debuts later in 2006.

DIRECTV* (United States)

DIRECTV, the leading digital TV service provider, is making its programming seamlessly available on PCs, laptops and media players through its verified set-top box. DIRECTV will collaborate with Intel on the development of a PC tuner that would enable DIRECTV customers to enjoy the high-quality digital DIRECTV entertainment experience, including a broad range of high-definition, original programming from the company's lineup, on a variety of devices.

Eros International* (Multiple Countries)

Eros International, one of the largest international distributors in the Indian film industry ("Bollywood") will make "B on Demand," its digital content portal and future digital video services, available for on-demand delivery over the Internet (www.bondemand.tv) for the first time ever via Intel® Viiv™ technology in 2006.

Grupo Televisa* (Multiple Countries)

Grupo Televisa, the largest media company in the Spanish-speaking world, will provide users a wide choice of popular soap operas (telenovelas), sporting events, news, late night shows and music from Televisa's Tarabu* digital music service on Intel® Viiv™ technology-based PCs.

IN2MOVIES GmbH & Co. KG – in2movies* (Germany)

Discover the world of digital film downloads: High quality and totally legal.

in2movies is the first download-to-own offer for movies and TV series available in German-speaking Europe. Download-to-own means that all movies and TV series will be available to keep for as long as you like. They are available in near DVD quality for your PC, laptop or TV.

The best thing about in2movies is that you pay only €6.99 to €14.99 for international products like "Harry Potter and the Goblet of Fire" and highlights of German cinema like "Good Bye Lenin". Beloved TV series like "Friends" and "Babylon 5" are ready to download for as little as €0.99 per episode. It's all available around the clock, without having to leave home or wait in line at the store.

Thanks to the innovative P2P technology from in2movies, downloads are not only totally safe and legal - they are incredibly fast. The movies and TV series can even be viewed while they are downloading. In addition, it's possible to get movies for free through the MoviePoints bonus program. You can receive MoviePoints by recommending downloads to other people or by uploading movies into the P2P technology system.

Visit www.in2movies.de (in Germany), www.in2movies.at (in Austria), or www.in2movies.ch (in Switzerland) now and get an instant reward of 250 MoviePoints.

Exent Technologies* (Multiple Countries)

Exent brings PC gaming to a whole new level with its new 10' Games-on-Demand service. Delivering a state-of-the-art gaming experience, users can now choose from a rich selection of game titles from the latest hits to old classics. The catalog includes titles from leading publishers such as Microsoft Game Studios, Atari, Eidos and more! Hundreds of titles from various genres including adventure, simulation, strategy, sports, kids and family are just a click away.

With a friendlier-than-ever user interface, users can easily browse through the library, select their game and begin playing in no time at all. There is no need to fully download the game, deal with annoying, error-prone installations or patch titles to play. Exent's 10' Games-on-Demand service is completely designed to fit the living room environment, with just a click of the remote to launch games. Simulating the ease of console-like gaming, games are controlled with a wireless gamepad, instead of the original bulky keyboard and mouse controls that are meant for 2' PC play.

GameTap™* (United States)

Launched by Turner Broadcasting, GameTap is a pioneer and leader in broadband entertainment that is verified to work with the Intel® Viiv™ technology platform. GameTap delivers more than 500 authentic versions of the greatest console, computer and arcade games on demand, including original, exclusive episodic properties like the forthcoming "Sam & Max" adventure, in collaboration with TellTale Games, and the latest incarnation of "Uru Live," with Cyan Worlds. In addition to games for every age and interest, GameTap TV offers more than 350 original entertainment programs, popular video streams and thriving virtual communities to broadband-connected PCs. New games and original programming are continually added to the service. GameTap is a downloadable application that supports navigation and game play using keyboard and mouse, as well as most USB peripherals. Go to www.gametap.com/viiv and expand your playground.
